ABOUT US

A LEGACY OF TRUST. A FUTURE OF EXCELLENCE.

WHO WE ARE

INTRODUCTION

Almoallam is a Saudi-based integrated solutions company providing facilities management, contracting, and project support services to critical industries and infrastructure sectors across Saudi Arabia. Operating as part of the Almoallam Group, the company has evolved from its roots in the Kingdom's early industrial development into a trusted partner supporting complex operations and essential environments nationwide.

Today, our 5,000+ strong workforce delivers a comprehensive portfolio of integrated solutions through three core divisions: Facilities Management, Contracting, and Project Support Services. Across these divisions, we support major public and private sector organizations with services ranging from integrated FM and industrial maintenance to electrical & instrumentation works, workforce support, and specialist technical solutions.

Our long-standing relationships with clients such as Aramco and Saudi Energy reflect not only operational capability, but a deep level of trust built through decades of reliable, high-performance service delivery in demanding and mission-critical environments.

What truly distinguishes Almoallam is our commitment to operational excellence, safety, and long-term partnership. Supported by experienced leadership, skilled technical teams, and disciplined systems and processes, we deliver integrated solutions that prioritize reliability, compliance, efficiency, and client satisfaction across every project and facility we support.

ALMOALLAM GROUP

Established in 1942, Almoallam Group is a proudly Saudi-owned organization that has grown alongside the Kingdom for more than eight decades, contributing to its progress and development across multiple sectors of the national economy.

Today, the Group operates a diverse portfolio of businesses spanning integrated facility management, construction and renovations, paper manufacturing for the medical and food industries, project support services, catering, real-estate development, and oil and gas solutions. Guided by principles of integrity, service excellence, and partnership, Almoallam Group is committed to supporting the objectives of Saudi Vision 2030 by driving sustainable growth, developing local talent, and creating long-term value.

With deep respect for its heritage and a clear focus on the future, Almoallam Group continues to work collaboratively with clients and communities - delivering dependable, forward-thinking solutions that contribute to a resilient, thriving Kingdom.

LEADERSHIP MESSAGE

MESSAGE FROM OUR CHAIRMAN

For more than eight decades, the Almoallam name has stood for integrity, commitment, and long-term partnership. From our earliest involvement in the Kingdom's industrial development to the diversified organization we are today, our focus has always been on delivering what we promise and building relationships that endure.

Through our three core divisions, we support critical industries, infrastructure, and communities with integrated solutions that prioritize reliability, safety, operational excellence, and long-term value. Whether managing complex facilities, delivering specialist industrial and technical services, or supporting projects with skilled manpower solutions, our commitment remains the same - to provide dependable services that support our clients' success.
Our strength lies in our people. With a highly experienced and talented team operating across a Kingdom-wide footprint, we are proud of the culture we have built - one that values responsibility, partnership, and excellence at every level of the organization.

As we look to the future, we remain committed to supporting our clients' ambitions, developing our people, and contributing positively to the Kingdom's continued growth. We are confident that by staying true to our values, Almoallam will continue to be a partner that our clients can depend on today and far into the future.

Hussain Almoallam
CHAIRMAN

OUR HISTORY & HERITAGE

THE EVOLUTION OF ALMOALLAM

The Almoallam story is closely intertwined with the growth and industrial development of the Kingdom of Saudi Arabia. Founded in the 1940s, the business began by supporting essential commercial and industrial operations, establishing a reputation for reliability and service at a time when the Kingdom's infrastructure was taking shape.

Over the decades, the Almoallam Group evolved in step with national priorities- expanding its capabilities, diversifying its services, and developing specialist expertise across industries critical to the Saudi economy. From early contracting and janitorial services to complex industrial support, energy-related services, and integrated facility management, each phase of growth reflects a disciplined response to market needs and long-term client requirements.

This progressive evolution ultimately led to the establishment of Almoallam as a dedicated, standalone business - built on decades of operational experience, trusted client relationships, and a deep understanding of managing critical environments. Today, Almoallam carries forward this legacy with a Kingdom-wide footprint, delivering dependable, high-performance services that support some of the nation's most important assets.

ALMOALLAM THROUGH THE DECADES

1940-1980

Building the Foundations

- Partnered with Aramco and government agencies to develop housing and infrastructure in the Eastern Region.
- Built thousands of homes and new neighborhoods, making a major contribution to national development.

1980-1990

Expanding Services, Growing Expertise

- Launched Landscaping & Gardening, Sanitization, Waste Management, and Housing Services.
- Developed and operated the Saihat Nursery, the largest in the GCC to support regional landscaping operations.

1990-2000

Resilience and Renewal

- In response to post-Gulf War demands, Almoallam executed major renovation and construction projects.
- Delivered high-quality Gated Community Services to Aramco and new clients across the Eastern & Western Regions.

2000-2010

Industrial Specialization

- Launched specialized Soft & Hard Facilities Management services for SEC and Aramco, serving industrial zones including power plants, refineries, and other oil & gas facilities.
- Established Chemical Factory for manufacturing of Oil & Gas Field Chemicals.

2010-2015

Integration and Accreditation

- Introduced Integrated Facilities Management (IFM) for industrial zones, commercial buildings, and gated communities.
- Strengthened construction capabilities for employee and public facilities. Fully developed Total Integrated FM services.
- Started Paper Board Packaging business at Industrial scale and state of the art machinery was acquired.
- Accredited with ISO 14001:2015, 9001:2015, and 45001:2018.

2015-2024

Industry Leadership

- Launched specialized plant maintenance for industrial and O&G sectors.
- Accredited by Aramco as a Total Integrated Facilities Management (TIFM) provider.
- Started Building Trade Services (Civil, Electrical, and Mechanical) in line with our major client and got awarded several LFC contracts.
- Won Best Contractor of the Year Award for 2022, 2023, and 2024 by Aramco.

2024-Present

Specialized Expansion

- Established Electrical and Instrumentation and Industrial Services departments for Mechanical Works, both targeting OGP clients and end users.

PEOPLE & CULTURE

WHERE PEOPLE COME FIRST. PERFORMANCE FOLLOWS.

PURPOSE - MISSION - VISION

Our Purpose, Mission and Vision define who we are and guide how we operate every day.
They reflect our commitment to delivering reliable, high-quality integrated support services, putting people first, and creating long-term value for our clients, partners, and communities. Together, they inform our decisions, and provide a clear direction for how Almoallam continues to grow, evolve, and support the environments in which people live and work.

OUR PURPOSE

To contribute meaningfully to the Kingdom's development by creating safe, dependable, and sustainable environments where industries operate, communities thrive, and people build long-term livelihoods.

OUR MISSION

To deliver integrated support services that are dependable and sustainable - built on integrity, long-term partnerships, and with a deep understanding of industrial, commercial, and community environments across the Kingdom

OUR VISION

To be the Kingdom's most trusted integrated services partner - renowned for long-term client relationships, exceptional operational standards, and a workplace where our people are proud to belong.

CORE VALUES

Our Values guide how we work and how we engage with our clients, partners, and each other. They help shape our culture, reinforce our commitment to excellence, and ensure that we act ethically and responsibly at all times.

TRUST: We build trust by acting with honesty, transparency, and unwavering reliability in every decision and action - standing by our clients and people to earn lasting respect.

EXCELLENCE: We pursue excellence across our entire organization - from service delivery and safety to leadership, governance, and people development.

RELIABILITY: We deliver consistent, dependable performance every day, especially in critical environments where failure is not an option.

ACCOUNTABILITY: We take ownership of our decisions and actions, holding ourselves accountable to our clients, our colleagues, and the communities we serve.

RESPONSIBILITY: We care for the safety and wellbeing of people first, protect the environments we operate in, and act as stewards of our communities and resources.

OUR PEOPLE

At Almoallam, our people are at the heart of everything we do. We foster a culture where wellbeing, development, and inclusion come first, enabling our teams to thrive while delivering exceptional service to our clients.

Employee Health, Wellbeing & Welfare:
We prioritize the safety, health, and overall wellbeing of our employees across all operations.

Employee Accommodation & Facilities:
Comfortable and well-equipped living and working spaces are provided to support staff across the Kingdom.

Training & Personal Development:
Continuous learning and professional growth are central to how we support and retain our talent.

Cultural Diversity & Inclusion:
We celebrate diversity and ensure an inclusive environment where all employees feel valued.

Opportunities for Women:
We actively promote female participation and leadership across the organization.

NATIONAL IMPACT

CONTRIBUTING TO THE KINGDOM'S PROGRESS, EVERY DAY.

Through these efforts, Almoallam continues to contribute to the creation of a diversified, sustainable, and future-ready economy, and to supporting the Kingdom's vision for long-term growth and prosperity.

ALIGNMENT WITH SAUDI VISION 2030

Our strategy is closely aligned with the objectives of Saudi Vision 2030 and its Vision Realization Programs (VRPs), ensuring that our operations contribute to national priorities across multiple sectors.

Fiscal Sustainability Program:
Supporting energy efficiency and responsible resource management through facility and infrastructure services that contribute to reduced environmental impact.

Housing Program:
Delivering high-quality facilities management services for residential communities and accommodation environments that support the development of modern, well-managed neighborhoods.

Human Capability Development Program:
Investing in the training, qualification, and long-term development of Saudi talent to build a skilled and competitive workforce.

Public Investment Fund (PIF) Program:
Supporting and partnering with PIF-backed entities across key sectors, contributing to the delivery of strategic national projects.

Quality of Life Program:
Enhancing living and working environments through service excellence and community-focused initiatives that improve wellbeing and everyday experiences.

NATIONAL IMPACT

At Almoallam, we are committed to contributing to the Kingdom's long-term development and economic diversification.

Through workforce nationalization, local content development, social responsibility initiatives, and alignment with national programs, we actively support the growth of sustainable industries, empowered communities, and a resilient economy.

NATIONALIZATION

We play an active role in advancing workforce nationalization by creating meaningful employment opportunities for Saudi nationals across operational and leadership roles. Through structured training, professional development, and career progression pathways, we invest in building a skilled local workforce equipped to support the Kingdom's evolving facilities management and industrial sectors.

Our approach goes beyond compliance, fostering long-term careers, developing capabilities, and contributing to the goals of a knowledge-based economy.

LOCAL CONTENT

Almoallam is committed to strengthening local content by maximizing in-Kingdom value across our operations. This includes prioritizing local procurement, developing partnerships with Saudi-based suppliers and service providers, and supporting the growth of domestic supply chains.

By sourcing goods and services locally, investing in local capabilities, and integrating Saudi talent into our operations, we contribute to the development of a more self-sufficient and sustainable economy, aligned with national local content objectives and industry best practices.

CORPORATE SOCIAL RESPONSIBILITY

We are committed to making a positive and lasting impact on the communities in which we operate. A key example is the development and full funding of a dedicated Autism Rehabilitation Centre in Dammam, for which our chairman was honored by His Royal Highness Prince Saud bin Nayef bin Abdulaziz Al Saud.

Alongside this, we continue to support initiatives that promote social wellbeing, community development, and improved quality of life, reflecting our responsibility as a long-term partner in the Kingdom's progress.

Almoallam

OUR SERVICE DIVISIONS

ONE INTEGRATED APPROACH. TOTAL FACILITY PERFORMANCE.

- FACILITIES MANAGEMENT DIVISION
- CONTRACTING SERVICES DIVISION
- PROJECT SUPPORT SERVICES DIVISION

FACILITIES MANAGEMENT DIVISION

Our FM Division delivers world class FM solutions through an integrated facility management model that brings together hard and soft services within a single, coordinated framework. This approach enhances operational efficiency and ensures every service contributes to reliability, performance, and long-term asset value.
The result is a seamless experience for our clients, with consistent standards, improved control, and high-quality outcomes across all facilities we manage.

INTEGRATED FM SOLUTIONS

HARD FM SERVICES

- MEP Maintenance
- Building & Infrastructure Maintenance
- Civil & Public Works
- Energy Management
- Asset Management
- Regulatory Compliance
- Fire & Safety Systems Maintenance
- Agent Services Management

SOFT FM SERVICES

- Cleaning & Hygiene
- Landscaping
- Pest Control
- Catering
- Workspace Management
- Hospitality
- Gated Community Management

HARD FM SERVICES

MEP MAINTENANCE

Our FM teams provide comprehensive MEP maintenance services to ensure the reliability, efficiency, and safety of critical building systems. Our approach combines planned preventative maintenance (PPM), responsive reactive maintenance, and condition-based interventions to maintain optimal system performance across diverse and high-demand facilities.

Supported by experienced engineering teams and structured maintenance regimes, we ensure that essential electro-mechanical and plumbing systems operate efficiently while minimizing downtime and supporting uninterrupted operations. Our maintenance strategies are increasingly enhanced through data-driven planning, digital reporting, and predictive insights that enable proactive system management and early identification of potential issue

BUILDING & INFRASTRUCTURE MAINTENANCE

Our FM teams deliver building and infrastructure maintenance services designed to preserve the integrity, safety, and functionality of building fabric, structural elements, and site infrastructure.

Our services include the maintenance of walls, ceilings, flooring, roofing systems, doors, windows, and external building elements, as well as site infrastructure such as roads, pavements, fencing, and drainage systems. Through structured inspections and preventative maintenance planning, we identify potential issues early and address them before they affect operations or asset condition.

CIVIL & PUBLIC WORKS

We provide civil and public works maintenance services focused on preserving the safety, functionality, and appearance of structural assets and public spaces. Our teams maintain a wide range of civil infrastructure, including structural elements, pavements, roads, walkways, boundary walls, and drainage systems, ensuring these assets remain safe, durable, and fully operational. Through structured inspection programs, preventative maintenance, and timely repairs, we address wear, environmental impact, and structural deterioration before they affect usability or safety.

ENERGY MANAGEMENT

Our Energy Management team delivers integrated, data-driven solutions designed to optimize energy performance across diverse facility portfolios. Drawing on extensive FM expertise across the Middle East, we combine engineering knowledge with operational discipline to reduce energy consumption, improve asset reliability, and strengthen cost control.

Our services include detailed energy audits, load profiling, utility benchmarking, and lifecycle cost analysis. A key component of our approach is asset retrofitting, upgrading existing mechanical and electrical systems to enhance efficiency and extend operational life, including HVAC optimization, lighting retrofits, building management system enhancements, and advanced metering integration. We also provide end-to-end solar energy solutions, supporting both on-grid and hybrid applications, and ensuring regulatory compliance while delivering measurable energy savings and return on investment.

ASSET MANAGEMENT

We provide structured asset management services designed to help clients maintain full visibility and control over their critical assets throughout their operational lifecycle. Our approach includes the development and management of comprehensive asset registers, aligned with systematic asset condition assessments and lifecycle analysis.

By combining accurate asset data with engineering expertise and long-term planning, we enable clients to optimize asset performance, manage capital expenditure more effectively, and ensure the continued reliability and value of their facilities.

REGULATORY COMPLIANCE

Our structured regulatory compliance services help clients to meet statutory, safety, and environmental obligations across diverse facility types. Our teams maintain a clear understanding of applicable local regulations, industry standards, and client-specific requirements, ensuring facilities remain fully compliant at all times. Services cover health and safety compliance, environmental controls, fire and life safety requirements, and operational documentation - supported by regular inspections, reporting, and corrective action management.

FIRE & SAFETY SYSTEMS MAINTENANCE

We provide specialized maintenance services for critical fire, safety, and life-support systems to ensure the protection of people, property, and facilities. Our teams maintain and service essential safety infrastructure, including fire alarm systems, fire-fighting systems, elevators, and uninterruptible power supply (UPS) systems, ensuring they remain fully operational and ready to perform when required. Through structured inspection programs, preventative maintenance, testing, and timely corrective interventions, we ensure compliance with safety regulations and industry standards.

MANAGING AGENT SERVICES

Our teams provide structured management of third-party contractors and specialist service providers across client facilities. Acting as the managing agent within FM contracts, we oversee the coordination, performance monitoring, and compliance of Agent Services, ensuring all work is carried out in accordance with agreed service standards, safety requirements, and contractual obligations.

SOFT FM SERVICES

CLEANING & HYGIENE

Our highly experienced and trained teams deliver comprehensive cleaning and hygiene solutions designed to uphold the highest standards of cleanliness, safety, and environmental responsibility. All teams follow BICSc-certified practices and protocols, ensuring our facilities consistently reflect cleaning excellence and professionalism. Using environmentally responsible products and techniques, we provide flexible services tailored to the unique needs of each client.

- **General Cleaning & Hygiene Services:** For offices, public spaces, and high-traffic areas, including scheduled and emergency interventions.
- **Industrial Cleaning:** For factories, warehouses, and other high-demand environments, where specialized equipment and safety procedures are required.
- **Specialist Cleaning:** For complex environments, including tank cleaning, duct and ventilation system cleaning, and other technical interventions.
- **Façade Cleaning:** Safety-driven cleaning for all building types, using a combination of methods tailored to the façade's specific material and height.

LANDSCAPING SERVICES

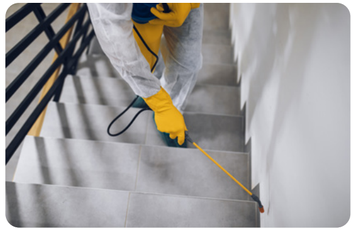

Our landscaping teams deliver integrated hard and soft landscaping solutions that enhance the functionality, safety, and visual identity of external environments. Our hard landscaping services cover the design, installation, and maintenance of external assets such as car parks, walkways, boundary works, recreational areas, and site infrastructure - ensuring outdoor spaces are durable, accessible, and aligned with the operational needs of each facility.

Our soft landscaping services focus on sustainable landscape design, planting, irrigation, and long-term care. We prioritize water-efficient irrigation systems, climate-appropriate and locally sourced plant species, and environmentally responsible maintenance practices that support long-term landscape health while minimizing resource consumption.

PEST CONTROL

Our professional pest control services protect people, property, and operational environments through safe, ethical, and environmentally responsible practices. Our approach focuses on prevention, early detection, and targeted treatment, minimizing disruption while effectively controlling pests across commercial, industrial, healthcare, residential, and public-sector facilities. We apply Integrated Pest Management (IPM) principles, prioritizing non-toxic and low-impact solutions wherever possible, supported by trained specialists and compliant application methods.

CATERING SERVICES

We deliver professional contract catering services designed to support workforce wellbeing, productivity, and satisfaction across corporate, industrial, and institutional environments. Our solutions emphasize consistency, quality, nutrition, and operational efficiency, providing reliable meal services tailored to site requirements, workforce demographics, and cultural preferences.

From staff cafeterias and industrial kitchens to accommodation facilities and remote locations, we manage end-to-end catering operations, including menu planning, food preparation, service delivery, and hygiene compliance. Our approach prioritizes safe food handling, balanced nutrition, and efficient service, supported by trained teams and standardized processes.

WORKSPACE MANAGEMENT

We provide workspace management services focused on organizing and optimizing office, study, and communal areas. By designing layouts for efficient space utilization, we help clients create functional, comfortable, and productive environments for employees and visitors.

HOSPITALITY SERVICES

We deliver a range of professional hospitality support services, including waiters, tea attendants and baristas, to enhance the day-to-day experience of facility users. Our trained teams ensure friendly, efficient, and reliable service delivery across corporate, institutional, and commercial environments.

GATED COMMUNITY MANAGEMENT

Our FM teams provide comprehensive management of gated communities and workforce accommodation, integrating on-site teams and operational oversight to maintain safe, functional, and welcoming environments.

- **Communal Facilities Support:** Operational management of communal and recreational facilities, including swimming pools, gyms, beaches, libraries, and sports areas.
- **Housekeeping Services:** Focused on room care and laundry services for accommodation facilities, maintaining clean, comfortable, and hygienic living spaces.
- **Concierge Services:** Personalized support for residents, assisting with daily requests, wayfinding, and coordination of on-site services.
- **Help Desk & Reception Services:** managing inquiries, coordinating facility operations, and supporting residents.

CONTRACTING SERVICES DIVISION

Our Contracting Services Division delivers specialized technical, industrial, and project-based services that support critical infrastructure, industrial operations, and built environments across the Kingdom. Combining engineering expertise, skilled technical teams, and disciplined project execution, we provide reliable solutions tailored to the operational, maintenance, and infrastructure requirements of our clients.

From industrial shutdown support and specialized mechanical services to fit-out works, utilities infrastructure, and electrical & instrumentation projects, our integrated approach ensures safe, efficient, and standards-compliant delivery across every stage of the project lifecycle.

Supported by experienced personnel, robust safety procedures, and a commitment to operational excellence, the Contracting Services Division helps clients to enhance reliability, maintain operational continuity, and achieve long-term performance across complex and mission-critical environments.

COMMUNITY & BUILDING TRADE SERVICES

- Renovations & Fit-Out
- HVAC Services
- Under Ground Utilities Services
- Building Trade Contracts
- General Service Contracts

INDUSTRIAL SPECIALIZED SERVICES

- Hydro-jetting Services
- Bolting & Torquing Services
- Steam Boiler Services
- Bundle Puller Services

ELECTRICAL & INSTRUMENTATION SERVICES

- Installation, Testing & Commissioning
- Preventive & Shutdown Maintenance
- Retrofitting & Upgrades
- Project Support

COMMUNITY & BUILDING TRADE SERVICES

RENOVATIONS & FIT-OUT

Our Contracting Services teams provide renovation and fit-out support solutions that enhance the functionality, efficiency, and longevity of operational spaces. Our services are focused on practical improvements to existing facilities, supporting evolving operational needs while minimizing disruption to day-to-day activities.

Services include layout planning, renovations, space reconfiguration, and interior fit-out works, delivered with meticulous coordination, safety oversight, and quality control.
Our integrated approach allows clients to adapt and optimize their spaces efficiently - without the complexity of managing multiple contractors or compromising operational continuity.

INDUSTRIAL HVAC SERVICES

Our Contracting Services Division provides comprehensive HVAC services that support the performance, efficiency, and reliability of client facilities. From system supply and installation to ongoing technical support, our teams deliver solutions tailored to operational requirements across commercial, residential, and industrial sectors.
Supported by skilled technicians and industry-standard practices, we ensure HVAC systems are installed, maintained, and optimized to deliver effective climate control, energy efficiency, and operational continuity. Our approach prioritizes safety, quality, and responsive service delivery to help clients maintain comfortable, efficient, and productive environments.

UNDERGROUND UTILITIES SERVICES

Our teams deliver safe and reliable underground utilities solutions that support essential infrastructure across industrial, commercial, and community developments. Services cover the installation, maintenance, repair, and upgrading of underground water, sewage, power, and telecommunications networks.
Working within strict safety and quality standards, we ensure all utility works are executed with careful planning, technical precision, and minimal disruption to surrounding operations and infrastructure. Our capabilities support both new developments and existing facilities, helping clients maintain resilient and efficient utility systems.

BUILDING TRADE CONTRACTS

Almoallam provides building trade contracting services to the residential, commercial, and industrial sectors, supporting clients with construction, renovation, and facility enhancement projects across a diverse range of scale and complexity.

Our expertise includes new construction works, structural modifications, refurbishment projects, and complete renovations, delivered through experienced teams with a strong focus on craftsmanship, quality, and operational efficiency. Through disciplined project management and close coordination with clients, we ensure projects are completed safely, on schedule, and within budget while maintaining the highest standards of workmanship.

GENERAL SERVICE CONTRACTS

Our General Service Contracts (GSC) teams deliver integrated Engineering, Procurement, and Construction (EPC) solutions for industrial and infrastructure projects across the Kingdom. We provide end-to-end project delivery capabilities, managing every stage from engineering design and material procurement through to construction, testing, commissioning, and handover.

With extensive experience supporting Saudi Aramco facilities and other major industrial environments, our teams execute projects in accordance with stringent technical, operational, and safety requirements. By combining engineering expertise, structured project controls, and efficient execution methodologies, we help clients to achieve reliable project delivery while maintaining quality, compliance, and operational continuity.

INDUSTRIAL SPECIALIZED SERVICES

HYDRO-JETTING SERVICES

Almoallam provides high-pressure hydro-jetting services designed to support critical maintenance and cleaning operations across the oil & gas, petrochemical, and industrial sectors. Using advanced high-velocity water jetting technology, our teams safely and effectively remove heavy contaminants, coatings, scale buildup, and blockages from process equipment and pipeline systems without the use of harsh chemicals.
This environmentally responsible cleaning method delivers deep and efficient results while supporting safer operations, reduced environmental impact, and improved equipment performance. Executed by trained specialists using industry-approved equipment and procedures, our hydro-jetting services help clients maintain operational efficiency, extend asset life, and reduce downtime during maintenance and shutdown activities. Our capabilities include the cleaning of heat exchangers, columns and vessels, process towers, storage tanks, fin fans, and associated pipelines and piping systems.

BOLTING & TORQUING SERVICES

Our Contracting Services teams deliver controlled bolting and precision torquing services for critical mechanical systems across industrial and process environments. Using calibrated hydraulic and pneumatic equipment, our experienced technicians ensure secure, leak-free flange connections and mechanical assemblies that comply with project specifications and industry standards.
These services play a critical role in maintaining system integrity, operational safety, and equipment reliability during construction, maintenance, and shutdown activities. Through disciplined procedures, quality assurance processes, and strict adherence to safety protocols, we help clients minimize operational risk while ensuring consistent and accurate joint performance.

STEAM BOILER SERVICES

Almoallam provides comprehensive steam boiler support services designed to maintain safe, efficient, and reliable boiler operations across industrial facilities. Our capabilities include boiler cleaning, maintenance support, operational assistance, inspections, and specialized servicing activities tailored to the operational requirements of each facility.
Supported by skilled technical teams and structured maintenance procedures, we help clients improve boiler performance, optimize efficiency, and reduce the risk of unplanned downtime. All services are delivered in accordance with strict safety and operational standards to support reliable long-term system performance.

BUNDLE PULLER SERVICES

We provide professional bundle pulling services for the safe extraction, handling, inspection, cleaning, and reinstallation of heat exchanger bundles during maintenance, repair, and turnaround activities. Using specialized hydraulic equipment and experienced operators, our teams execute bundle pulling operations with precision while minimizing risk to personnel, equipment, and surrounding infrastructure.

Our structured approach supports faster maintenance turnaround times, improved equipment accessibility, and reduced operational disruption. By ensuring safe and efficient exchanger handling processes, we help clients maintain asset reliability and optimize maintenance performance across critical industrial operations.

ELECTRICAL & INSTRUMENTATION SERVICES

Almoallam's Electrical & Instrumentation (E&I) Services team delivers reliable, high-quality solutions that support the safe and efficient operation of electrical infrastructure across industrial, commercial, and infrastructure environments. Our capabilities cover low, medium, and high-voltage (LV, MV, HV) systems, supported by experienced technical teams, advanced testing equipment, and disciplined operational procedures.

From installation and commissioning to preventive maintenance, shutdown support, and system upgrades, we provide end-to-end electrical and instrumentation services designed to improve reliability, maintain compliance, and extend asset lifecycle performance. All activities are executed in accordance with stringent safety, technical, and regulatory standards to ensure operational continuity within critical environments.

INSTALLATION, TESTING & COMMISSIONING

We provide full lifecycle support for electrical and instrumentation systems, including installation, testing, commissioning, and system verification. Our teams support substations, transformers, switchgear, control panels, UPS and ATS systems, LV/MV cabling, bus ducts, and energy metering infrastructure, ensuring systems are installed and commissioned safely, efficiently, and in accordance with project specifications.

PREVENTIVE & SHUTDOWN MAINTENANCE

Our preventive and shutdown maintenance services are designed to maintain system reliability, reduce operational risk, and minimize unplanned downtime. Services include routine inspections, testing, calibration, and maintenance of circuit breakers, transformers, switchboards, protection relays, battery banks, and associated electrical systems during both planned shutdowns and live operational periods.

RETROFITTING & UPGRADES

Almoallam supports clients with the modernization and upgrading of aging electrical infrastructure to improve performance, reliability, and safety. Our retrofitting services include upgrades to LV/MV systems, ATS schemes, control circuits, protection relays, and associated electrical components, helping clients extend equipment lifespan while aligning systems with evolving operational and compliance requirements.

PROJECT SUPPORT

Our teams provide specialized technical support services for complex electrical and instrumentation projects across industrial and infrastructure sectors. Capabilities include power quality studies, network analysis, technical troubleshooting, system assessments, and the provision of qualified technical manpower to support project delivery, maintenance programs, and shutdown activities.

Supported by highly skilled personnel, industry certifications, and internationally aligned quality, environmental, and safety management systems, Almoallam's E&I Services teams deliver dependable solutions that enhance operational performance, improve system resilience, and support the safe operation of critical assets.

PROJECT SUPPORT SERVICES DIVISION (PSSD)

Almoallam's Project Support Services Division (PSSD) delivers specialized workforce solutions that support industrial, oil & gas, construction, and infrastructure projects across Saudi Arabia. Through efficient sourcing, rapid mobilization, and structured workforce management, we provide qualified, certified, and project-ready personnel that help clients maintain operational continuity, regulatory compliance, and timely project execution across shutdowns, construction programs, maintenance activities, and long-term operations.

Combining operational agility with deep industry understanding, our teams support clients with scalable manpower solutions tailored to specific project requirements and operational environments. Supported by robust workforce management systems, dedicated coordination teams, and strict compliance procedures, PSSD enables clients to execute projects safely, efficiently, and with confidence.

RELIABLE, COMPLIANT & SCALABLE WORKFORCE SOLUTIONS

SPECIALIZED WORKFORCE SOLUTIONS

We provide end-to-end supplementary manpower solutions designed to meet the operational and technical requirements of industrial and infrastructure projects. From short-term shutdown activities to long-term operational support, our services are tailored to the scale, complexity, and timeline of each project.
All personnel undergo structured screening, credential verification, and safety inductions to ensure compliance with client standards, Saudi regulatory requirements, and industry certifications, including Saudi Aramco approvals where applicable.

STRATEGIC WORKFORCE SOURCING & DEPLOYMENT

Our established recruitment networks and workforce sourcing capabilities enable us to identify, evaluate, and mobilize qualified personnel efficiently and without delay. By aligning workforce selection with project specifications and operational requirements, we ensure clients receive skilled and experienced personnel capable of supporting safe and productive project execution.

RAPID MOBILIZATION & OPERATIONAL SUPPORT

Almoallam's streamlined mobilization processes allow us to respond quickly to urgent workforce requirements while supporting uninterrupted operations and project continuity. Our dedicated coordination teams provide 24/7 operational oversight, managing workforce logistics, site requirements, transportation, accommodation coordination, and emergency response support to maintain operational stability at all times.

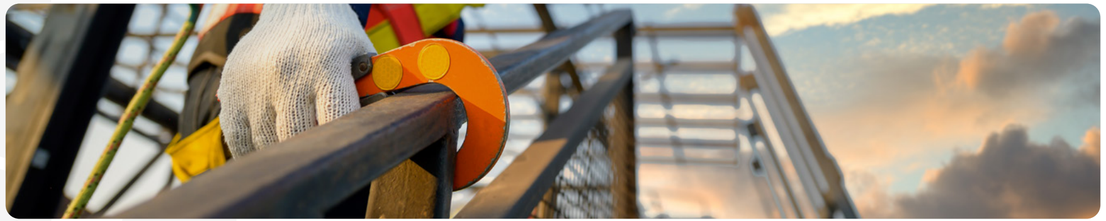

PROJECT SUPPORT SERVICES DIVISION

CERTIFIED & SAFETY-COMPLIANT WORKFORCES

Safety and compliance are central to our workforce management approach. All personnel are deployed in accordance with strict safety procedures, certification requirements, and client standards. This includes credential verification, safety training, and compliance management for industrial, offshore, and high-risk operating environments.

WORKFORCE STABILITY & EMPLOYEE SUPPORT

We maintain workforce reliability through structured employee engagement programs, timely payroll administration, welfare support, and efficient HR management systems. Supported by Microsoft Dynamics 365 ERP and structured workforce management processes, we ensure transparency, compliance, workforce stability, and reduced turnover across all operations.

WORKFORCE CAPABILITIES (ONSHORE / OFFSHORE)

PSSD provides qualified and certified personnel across engineering, technical, supervisory, operational, and support disciplines, including:

Engineering & Project Management
- Project Managers
- Construction Managers
- Project Engineers
- Process Engineers
- Design Engineers
- Planners & Schedulers
- Cost Controllers
- Contract Administrators

HSE & Compliance
- HSE Personnel (Aramco & Non-Aramco Certified)
- PTW / WPR Personnel
- Scaffold Supervisors & Inspectors

Quality & Technical Specialists
- QA/QC Personnel
- Technical Advisors
- DCS Operators

Supervisory & Skilled Workforce
- Supervisors & Foremen
- Multi-Certified Welders
- Rigging Crews
- Mechanical, Electrical & Instrumentation Crews
- Piping Fabricators & Fitters

Operational & Support Personnel
- Heavy Equipment Operators & Drivers
- Drilling Crews
- Draftsmen
- Logistics & Procurement Personnel
- Administrative & Operational Support Staff

COMPETITIVE ADVANTAGE

Almoallam combines operational agility, regulatory compliance expertise, and industry experience to deliver workforce solutions aligned with complex project requirements and demanding operational environments.

Our deep understanding of industrial sector requirements, combined with structured HR administration, Saudization compliance, visa and iqama management expertise, and efficient workforce systems, enables us to provide reliable, scalable, and fully compliant manpower support across the Kingdom.

INTEGRATED SOLUTIONS THROUGH STRATEGIC PARTNERSHIPS

Beyond its core service offerings, Almoallam is committed to continuously enhancing the value delivered to its clients through a carefully selected network of strategic partnerships. By collaborating with leading regional and international specialists, we complement our in-house capabilities with advanced technologies, specialized expertise, and innovative service solutions that support safer, smarter, and more sustainable operations.

Our partnership-led solutions include:

- Robotic Duct Cleaning
- Indoor Air Quality Monitoring
- Integrated CAFM, Digital Twin, AI & IoT Technologies
- Fire Protection & Life Safety Solutions
- High-Rise & At-Height Access Services
- Integrated Energy Management, from Audits to Retrofits

Through these strategic partnerships, we provide our clients with more integrated, efficient, and future-focused management solutions. The result is enhanced operational performance, improved sustainability, and measurable added value across the full lifecycle of the assets, facilities and infrastructure we support.

COMMITMENT TO SAFETY, QUALITY & THE ENVIRONMENT

SAFETY & QUALITY

Safety and Quality are fundamental to how Almoallam delivers services across every facility and operating environment. Our approach is built on a structured management framework that embeds safety-first thinking, clearly defined procedures, and consistent quality standards into day-to-day operations.

We operate with a 'Zero Incidents' mindset, reinforced through safety-led standard operating procedures, regular training, toolbox talks, and proactive risk assessment- ensuring the wellbeing of our people, clients, and end users at all times.
Our Quality and Occupational Health & Safety management systems are certified to ISO 9001:2015 and ISO 45001:2018, reflecting our commitment to disciplined processes, continuous improvement, and internationally recognized best practices in service delivery and workplace safety.

ENVIRONMENTAL SUSTAINABILITY

Environmental responsibility is an integral part of Almoallam's strategic approach to service delivery, and we are committed to reducing environmental impact while supporting efficient, sustainable operations across the Kingdom.
Our Environmental Management System is certified to ISO 14001:2015, guiding how we manage resources, control environmental risks, and embed sustainability considerations into service delivery. This includes responsible waste management, environmentally conscious cleaning services, efficient landscaping and irrigation practices, and sustainable maintenance activities.

Through continuous improvement and alignment with national sustainability priorities, we support our clients in creating facilities that are compliant, resource-efficient, and environmentally responsible over the long term.
